Washington, DC 20554

Dear The Federal Communications Commission,

I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my sister's current service unaffordable.

My sister who is handicapped and low income uses a prepaid wireless phone for safety and security. She should not have to pay more or lose this lifeline so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

Keep the USF Fair!

Sincerely,

Lucinda Brown Sarasota, Florida
